

Kinaxis Planning One RapidStart Deployment Solution

“You don’t have to build it from scratch.

Maestro brings the same planning principles trusted by global leaders — right-sized for your business, ready to deliver impact in less than 120 days.”

Why Kinaxis RapidStart Approach

- Fast deployment
- Lower upfront investment
- Minimal IT dependency
- Cloud-first approach
- Standard best practices

Recommended Scope

- ✓ Demand Planning
- ✓ Supply Planning
- ✓ Basic inventory planning
- ✓ Standard dashboards
- ✓ ERP integration Closed loop in Phase 2

Go live Timelines: **16–20 weeks** | Commercials Licensing & Implementation cost (Small Mid Market)

\$246,963
License

\$286,450
Offshore Model

\$392,200
Hybrid Model

Users licenses: 2-Full user, 2 Light Users and 2 KLC users

Offshore Implementation: Lower implementation cost, Remote delivery model, Standardized deployment approach, Faster staffing scalability

Hybrid Implementation: Combination of onsite and offshore experts, Enhanced business workshops, Executive stakeholder alignment, Stronger change management support

What’s included in this package: Standard planning one template, flat file integration without closed loop focused on Rapid start approach with predefined resources config only.

Key Benefits:

Faster scenario planning with business and planning benefits

- Replace spreadsheets
- Better planner productivity
- 30–50% faster planning cycle
- Improve forecast accuracy
- Improve executive visibility
- Reduce inventory carrying costs
- Better service levels
- Lower upfront investment
- Minimal IT dependency
- Faster response to supply disruptions

Assumptions

Pricing and timelines depend on Number of users, Planning scope, Integration complexity, Data quality Global rollout requirements & Customization requirements

Why Bristlecone

Bristlecone combines deep supply chain domain expertise with Kinaxis implementation & accelerators to help customers achieve faster deployments, reduced risk, and measurable business outcomes.

Methodology:
