

# AI-POWERED DIGITIZATION AND AUTOMATION OF SUPPLY CHAIN TRANSACTION DOCUMENTS

## Client Profile

Recognized as one of the fastest-growing companies in North America five times by Inc. Magazine. They are pushing the boundaries of the freight forwarding industry with a laser focus on customer needs and ground-breaking technology.

## Business Context

- Large number of fast-moving critical documents – invoices, shipping instructions, booking confirmations from customer and carriers
- All documents had multiple layouts and document formats

## Challenges

- Manual process of extracting information resulting in increased processing time and delays
- Low accuracy of manual process leading to re-work

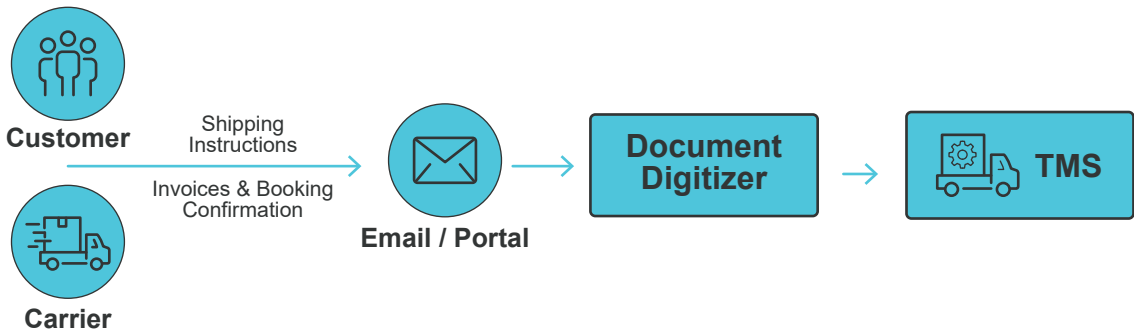

## Solution

- The solution employs AI, OCR and NLP to understand different types of documents and convert key data points into digital information
- It is able to process multiple document formats and file types, including PDFs, images and emails, and also integrate data from the body of an email and its attachments

## Digital Enablers

## Business Impact

- Savings up to \$1 million over 18 months
- Accomplished multiple digitization use cases with just one platform
- Increased accuracy of the digitization process and workflow automation with a substantial reduction in human error
- Optimal re-deployment of 25 resources to high value-adding activities

## Bristlecone Advantage

- Deep domain expertise
- Solution and technology enablers
- Two decades of experience in automation and data engineering
