

CASE STUDY

Integration Journey with a Leading Financial Information Services Provider

Redesign and scale the connector development program to support over \$500M revenue generation goal.

The Company

Headquarters – United States

Industry – Fintech

Brings organizations the information, expertise and HR solutions they need to help meet compliance commitments and manage the changes that impact their workforce.

Challenges

- Integration capabilities with respect to ATS (Applicant Tracking System), HR System and Platform Capabilities
- Need to accelerate the development of connector and platform services
- Customer had spent \$5M without much success in integrations

Solution

- Comprehensive connector development and support services to enable the client to deliver end-to-end workflows to end customers
- Enabled the design of a hub and spoke architecture for partner integration
- Enhanced customer platform capabilities

Benefits

- ✓ Accelerated transformation to value chain provider
- ✓ Rapid business expansion through accelerated integration roadmap
- ✓ Plug and play integration capabilities based on the end point roadmap
- ✓ Movement from on-premise to cloud

Business Impact

Embraced Digital Transformation
